THE IMPORTANCE OF FORMING FINANCIAL LITERACY IN PRIMARY SCHOOL STUDENTS

Kurbonova Nigora Baxtiyor kizi
2nd year graduate of Tashkent Chemical International University

Abstract: This article highlights the problem of creating financial literacy in elementary school students and the importance of starting financial education from a young age. By examining the current state of financial education in elementary schools, identifying barriers to financial literacy instruction, and proposing potential solutions, this paper addresses the need to improve financial education for young students. aimed at raising awareness.

Keywords: financial literacy, primary school students, education, barriers, solutions.

Introduction

Today, The Times are increasingly developing and advancing. When we look at Bora – bora taking a simple tilde, as new discoveries, new knowledge, new techniques have been discovered, the flow of information has accelerated, people are becoming more demanding of each other in the forward direction. This, in turn, has to take a different look at what we know. For example money…

Dealing with money is also a science. Its importance is not at all inferior to such subjects as physics, mathematics, which are taught in schools. Unfortunately, this science is not taught in schools. Someone who does not know about money will definitely lose. Today, special educational institutions that teach what money is, are conducting their activities in all parts of the world. So our society too it is also advancing a number of proposals for a responsible task.

Aimed at the formation of financial literacy in Uzbekistan

there are a number of government decisions and programs. This issue is being seriously considered by the state, since increasing financial literacy is important for ensuring economic stability in society and improving the economic well-being of the population.

Decree No. 6078 of the president of the Republic of Uzbekistan “on measures to increase financial literacy and development of financial technologies”dated June 19, 2020 is one of the main documents aimed at increasing financial literacy in Uzbekistan. The decree sets out measures aimed at developing and implementing programs to improve the financial literacy of the population, communicating economic and financial knowledge to the general public, facilitating access to financial services and improving the financial education system.

"Roadmap for increasing financial literacy" (2020) –

This document confirms the strategy aimed at increasing financial literacy in Uzbekistan. In it, the dissemination of financial knowledge to the general public, in particular, for young people, pensioners and other social groups, banks, insurance companies

and in cooperation with other financial organizations, it is planned to organize various trainings and seminars.

Decision of the president of the Republic of Uzbekistan dated December 5, 2019

No. PQ-4473 – a decision called “measures to improve the system of development and protection of financial literacy”, aimed at ensuring the widespread distribution of financial services among the population. In this decision: population

and the issues of organizing special trainings and educational programs, developing and monitoring the National Financial Literacy Index are raised in order to increase financial literacy among business entities.

The" state program for the development of financial technologies " (2020) is a program aimed at facilitating financial services and technologies, with a great emphasis on expanding the possibilities of using mobile payments, online banking services and other financial technologies, digitizing the financial market of Uzbekistan, while increasing the financial literacy of the population.

These programs and documents, in turn, aim to introduce the population and business to more advanced financial practices.

Financial literacy is the ability to understand and effectively manage one's finances.is. It includes skills such as budgeting, saving, investing, and understanding basic economic concepts. While financial literacy is important for individuals of all ages, it is important to start teaching these skills especially to children at an early age.

Financial literacy is an important skill that everyone must possess in order to effectively manage their finances and make conscious decisions about money. In today's complex and rapidly developing world, it is more important than ever to provide children with the necessary knowledge and skills to act in a financial situation.

Budgeting is an important skill that children need to learn early. By teaching children to make budgets and track their expenses, it is advisable for them to develop good-income ways of earning money and financial measure management skills to help them avoid debts and live within their own means.

Currently, primary schools often lack adequate tools and curricula to effectively teach financial literacy. Many teachers may not have the necessary training or knowledge to incorporate financial education into their classes. In addition, politicians in prioritizing financial literacy in primary schools and may not be supported by educational institutions.

In the course of the study, he studies the problems associated with the formation of financial literacy in primary school students and proposes purposeful solutions to solve this problem.

Financial literacy is an important skill that everyone should possess, regardless of age. However, the importance of financial literacy in educating young children is often overlooked. While many schools focus on teaching basic math and reading skills, there is not enough emphasis on teaching children about the value of money and how to manage it effectively.

An important aspect of teaching financial literacy to primary school students is preparing them to make future economic and financial decisions. This includes:

formation of healthy financial habits such as careful spending of money on children, making savings, avoiding excessive purchases;

explaining to readers what the consequences of their financial decisions are, for example, improving future well-being by making savings or investing funds.

Another important aspect of financial literacy is humanism

and Justice. It is also important to teach children about equal distribution of financial opportunities and resources, about ensuring financial justice in society.

Formation of financial literacy in primary school teachers –

it is not only to prepare children to solve financial problems, but also to teach them to make responsible, rational and fair economic decisions in the future. Through this process, students acquire the necessary skills to achieve financial well-being by properly knowing their place in society.

Therefore, the problem of the formation of financial literacy in primary school students is an urgent

issue that needs to be solved. Without understanding, Nazirite, practical education in this area, children will then cause them to grow up without the necessary skills to make conscious financial decisions in their lives. This implies that it leads to debt circulation, unsatisfactory and erratic financial management, and general financial instability. One of the main reasons for the low financial literacy of Primary School students is the lack of formal and planned education in the subject in most school curricula. While some schools may refer to basic concepts such as calculating or budgeting money in math classes, it is often ignored that a deeper understanding of financial principles is given sufficient knowledge and understanding more broadly.

In addition, parents can also play a role in contributing to the problem. Many parents themselves may not have strong financial literacy skills, and so they work to teach their children how to manage money. The lack of domestic knowledge and guidance exacerbates this problem.

To solve this problem, it is advisable for schools to include financial literacy education in their primary education system, curriculum. By introducing basic concepts such as budgeting, saving, investing and understanding interest rates, children begin to build a solid foundation for their future financial well-being.

In addition, parents should also be actively involved in teaching their children to manage money. This should also be done through simple actions such as organizing a “personal fund”, that is, a “coin box”, or involving children in discussing the family budget, in order to save.

Also parents through online and community organizations

and there are various resources that help teachers to teach children financial literacy. By working together to provide a comprehensive education on this topic, it is essential that we increase the knowledge and skills necessary for our students to make reasonable financial decisions throughout their lives.

As we understand, financial literacy is an important life skill that everyone needs to have in order to make conscious decisions about money management. It is never too early to teach children about the importance of financial literacy, it is considered a great time to start laying the foundation so that they can use money correctly, with responsibility in the elementary school. Various ways to educate elementary school students in financial literacy can be done, including solving problematic situational keys, reading stories, and hands-on activities.

One effective way to teach financial literacy to elementary school students is to solve the problem. By providing readers with scenarios and challenges where real and life financial situations are presented, they can learn how to analyze situations and make conscious decisions about money. For example, teachers can create mathematical problems that include budgeting, saving, and spending money. Students

they can work in groups or individually to solve these problems, helping to develop their critical thinking skills and financial abilities.

Reading money management stories is another fun way to teach financial literacy to elementary school students. There are many children's books dedicated to topics such as savings, budgeting, investing and charity. For example, (a story about money in an elementary reading literacy textbook) by incorporating these stories into the curriculum, teachers can help students understand important financial concepts in an interesting and interrelated way. Reading about the heroes who received smart financial choices in financial stories

and it is natural that learning inspires students to accept the same choices in their lives.

Practical training is also valuable when teaching financial literacy to primary school students. By

engaging in activities such as setting up a class shop, creating a budget for a class project, or participating in a fake Stock Market Game, students can gain practical experience in spending money correctly and in savings. These practical exercises will not only strengthen important financial concepts, but also help children develop valuable skills such as correct and purposeful decision-making, problem-solving and teamwork.

Adding technology to financial literacy education can also increase student engagement and learning. There are many online resources and apps that provide interactive lessons on topics such as budgeting, saving, investing, and credit management. Teachers use these tools to complement their lessons and gives students additional opportunities to practice their financial skills in a virtual setting. Another important concept that should be emphasized in financial literacy education is savings. Children should be aware of the importance of saving their accumulated income for short-term purposes such as buying toys or going on a trip, as well as for long-term purposes such as a contract or pension for university education. By absorbing the habit of thrift early on, students build a solid foundation for their future financial security.

Another key aspect of financial literacy is that it should be included in primary school students. While investing may seem like a complex topic, learners can learn about basic investment principles such as risk and income, diversification, and age-appropriate interest. By understanding these concepts early on, students understand the benefits of investing for long-term growth.

Finally, students should be taught about the value of money and how to make a conscious purchase decision. Needs and by exploring concepts such as desires, comparative shopping, and advertising tactics, students develop critical thinking skills that help them make reasonable financial choices throughout their lives.

In general, the formation of financial literacy in primary school students requires a multifaceted approach that combines problem solving, story reading, Practical Work and technology integration. To children

By providing comprehensive money management training from the age of 7, teachers can give them the opportunity to make reasonable financial decisions throughout their lives. It is natural for elementary school students to develop the knowledge and skills necessary to be financially responsible if they have the right tools and resources at their disposal.

Conclusion

In conclusion, it can be said that the formation of financial literacy in primary school students is carried out by teachers, organizers in the financial system and it is an important issue that requires the attention of parents. By giving children the knowledge and skills to make conscious financial decisions from an early age, it is essential that we give them the opportunity to achieve long-term financial stability and success.

The formation of financial literacy in primary school students is necessary for them to achieve success in the future. Solving this problem by improving training programs and increasing parental activity, we can help our children have the necessary tools to act with confidence and competence in a complex financial world.

It is essential that schools prioritize financial education in their curriculum and provide teachers with the necessary resources and training to effectively teach these concepts. In addition, parents play an important role in strengthening financial lessons at home and setting a positive example for their children.
