REFORMS OF ABDULLAH II THAT LEFT AN INDELIBLE MARK ON THE HISTORY OF THE KHANATE.

L.S.Burkhanov

Teacher of the Department of General History of Jizzakh State Pedagogical University.

Annotation.

This article attempts to highlight the struggle of Abdullah II for the establishment of a centralized state, the provision of peace and tranquility in the country, the struggle to raise the country's economy, the place in the history of our statehood.

Keywords. Shaybani Khan, Abdullah Khan II, Dashti Kipchak , rabot, sardoba, V.V.Bartold, Hafiz familiar Bukhari," Sharafnomayi shahiy"," the Battle of Abdullah Khan", monetary reform, shekel.

In the course of the monetary reform of Abdullah II, the money issued in Bukhara was put into bab-fold circulation in the Bukhara Khanate. This not only contributed to the further centralization of the state government, but also increased the socio-political importance of Bukhara. At the same time, the implementation of this policy will be facilitated by the considerable centralization of the state and the considerable centralization of the Khan's power under Abdullah II. The increasing revenue falling from minting to the state treasury helped to expand and regulate trade.

During the reign of Abdullah II, a number of madrasas, machites, as well as many hammoms were built. According to sources, Antoni Jenkinson is said to have recognized that the baths built in Bukhara were extremely tastefully and skillfully built and that there were no such hammoms anywhere in the world.

By this time, the Bukhara market was divided into stalls serving certain types of crafts and trade: the "Chorsu", built in the time of Abdullah Khan," survived until our time. Domed buildings were built at the intersection of the kilns in the" Chorsu " market, which were the buildings housed telpakfurushes (toqi-telpakfurushon), jewelers (toqi-zargaron), sarrofsudwers (toqi-sarrafon), etc. On top of the market here, in 1587, Abdullah Khan built tim, an alien for merchants who brought goods from other lands. Many palaces, madrasas, khanakas, mosques were built in Bukhara. For example, Gavkushon romli karvopsaroy of Haji Saadi, built in 1570, and a palace near Liysak maschiti, built in 1560, also served merchants they came from other lands. Also, the Jome mosque, Mir Arab, Abdullahan, Modarihan, Gavkushan, Skyscraper madrasas, bath sarrofon were built.

During the reign of the shaybanids, the noble classes of Bukhara were interested in music. In these years, poetry in Uzbek and Tajik will flourish. Religious studies, musicology, calligraphy, miniature art were valued. The results of the activities of Abdullah Khan in strengthening the state system of government in the domestic policy of the country, especially for the conduct of monetary reform, were preserved even in later periods. He wells many different structures. So far it is given to Amir Temur or Abdullah Khan that the construction of one or another structure among the people of Bukhara during the reign of Abdullah Khan[1] in the nearby sumitan (near) mausoleum of Abu Bakr Said (D.970/971) of the Joibor Khojas of atrophigamadrasa, mosque, Khanaqah and chorbog' in 1558 – 1566, in Bukhara, the Madrasa of Abdullahan, hamom, Govkushan, Fathulla Khoshbegi, mirakan

VOLUME-5, ISSUE-5

Khoja Porso, a new Chorsu was built between 1569 and 1570, a bridge over the Zarafshan River near Tim (Abdullah Khan Timi), Karmana in 1582, and other structures.[2]

Abdullah Khan Bandhi-by Abdullah Khan in the 80s of the 16th century is a built reservoir. The remains of this structure are 65 km from the center of nurota district to the east, on the beklarsoy gorge near the old village of Oqchob, today stored. From 1957 to 1962, the acadimia of Sciences of Uzbekistan was established in the history and studied by scientists from the Institute of Archaeology. Abdullah Khan ban dthe dam is built of slans stones, a special hook resistant to the water of rock palachsas the mixture is covered with a crumb. At the base of the node of the dam is 73 m, above it is 85 m, with a height of 14.5 m. In this, water pressure as well as its subversive power taking into account the thickness of the base of the dam is 15.3 m , the top is 4.5 m built in the form of a staircase. An Ombar of water formed in front of the dam it was 1.5 km long and 75 – 125 m wide. Abdullah Khan band approximately 1.2 mln. Cubic meters of water were collected.[3]

Arch below the structure, whiteboard, The surroundings of the villages of arashgiy, Ravot, Jilon – tamgali and Soykechar are well watered was. The territory of these villages of the XVI century is about 1.2 thousand ha of land the area is.

Abdullah Khan Madrasa of the Khosh madrasa ensemble in Bukhara it is an architectural monument located in the northern part. This is the architect of the madrasa

unknown, it was built by Order of Abdullah Khan between 1588 and 1590. The structure is quite different from the usual madrasas. The courtyard is surrounded by two-sided cells surround it, as well as a high pedestal on either side.

Through the roofs, the interior rooms and the attic are transferred. This is the Madrasa of Bukhara demonstrates all the creative achievements of its architecture in the XVI century.

Abdullah Khan timi is the largest usti berk trading Rast in Bukhara, he It will be erected by order of Abdullah Khan in 1577. The basis of this Tim jam tarxli (39x42 m), 3 sides berk, is entered through a head-style pedestal.

The largest and form among the chorus – odd buildings of the trade stalls in Bukhara shamoyilically considered much more complex and elegant. It is also the name of a number of complexes are repaired.

In terms of splendor, even under the shaybanids, buildings were built that were not inferior to those built under the Timurids. Bukhara has become more plump, especially since its appearance has become more beautiful. It was rebuilt in a fundamental sense. The plan of the city changed, large ensembles appeared, which gave the image of the city even more lush splendor and charm. Most of the building structures typical of Usha period architecture still survive.

With the strengthening of Bukhara's political role by the 16th century, the need arises to rebuild the Bukhara wall, slightly expanding the city limits. Measures will be taken in the city that will allow the further development of unarmament and trade. Spacious areas for shopping stalls and craft shops are built within the city.
