Iqtisodiyotni barqarorligini ta'minlashda eksport strategiyalarini ishlab chiqish va unga ta'sir qiluvchi omillar tahlili

"Development of Export Strategies and Analysis of Influencing Factors in Ensuring Economic Stability"

Bobosherov Abdumalik Abdiğafforovich.

Termiz iqtisodiyot va servis universiteti

Magistratura bo'limi, Iqtisodiyot (tarmoqlar va sohalar bo'yicha) mutaxassisligi 2 bosqich talabasi.

Ilmiy rahbar: i.f.f.d. Dots**. T.A.Mamadjanova**

ANNOTATSIYA (ANNOTATION / АННОТАЦИЯ)

O‘zbekcha:

Ushbu maqolada eksport strategiyalarining iqtisodiy barqarorlikni ta’minlashdagi o‘rni va ahamiyati tahlil qilingan. Eksport faoliyati orqali milliy iqtisodiyotning tashqi shoklarga bardoshligi, valyuta tushumlarining barqarorligi va sanoat tarmoqlarining diversifikatsiyasi kuchayadi. Maqolada O‘zbekiston misolida eksport siyosatining samaradorligi, unga ta’sir qiluvchi omillar va ularni bartaraf etish bo‘yicha takliflar bayon etilgan.

ANNOTATION

This article analyzes the role and importance of export strategies in ensuring economic stability. Through export activities, the national economy becomes more resilient to external shocks, foreign exchange earnings become stable, and the diversification of industrial sectors is enhanced. The article presents an overview of the effectiveness of Uzbekistan’s export policy, identifies influencing factors, and provides proposals to overcome existing challenges.

АННОТАЦИЯ

В данной статье проанализирована роль и значение экспортных стратегий в обеспечении экономической стабильности. Экспортная деятельность способствует устойчивости национальной экономики к внешним шокам, стабильности валютных поступлений и диверсификации промышленных отраслей. На примере Узбекистана рассмотрена эффективность экспортной политики, определены влияющие факторы и предложены пути их устранения.

KALIT SO‘ZLAR: eksport strategiyasi, iqtisodiy barqarorlik, valyuta tushumi, tashqi savdo, eksport omillari, O‘zbekiston

KEYWORDS: export strategy, economic stability, foreign exchange revenue, external export factors, Uzbekistan

КЛЮЧЕВЫЕ СЛОВА: экспортная стратегия, экономическая стабильность, валютные поступления, внешняя торговля, экспортные факторы, Узбекистан

Introduction

In the context of modern global challenges such as pandemics, geopolitical tensions, and economic crises, countries increasingly rely on export-oriented strategies to achieve macroeconomic stability. Export not only generates foreign exchange but also stimulates production, expands employment, and strengthens integration into global value chains. Uzbekistan has embraced this path by launching a series of structural reforms aimed at boosting export potential as outlined in the 2022–2026 Development Strategy of "New Uzbekistan."

THE MULTIDISCIPLINARY JOURNAL OF SCIENCE AND TECHNOLOGY

VOLUME-5, ISSUE-5

Recent years have seen improvements in trade facilitation, customs procedures, and the introduction of digital export platforms. However, numerous constraints still limit the effective implementation of export strategies, including high logistics costs, limited access to export finance, insufficient international certification, and weak diplomatic-commercial ties with new markets.

This paper investigates the effectiveness of export strategies in stabilizing the economy of Uzbekistan and analyzes the major factors affecting export performance.

Relevance

Ongoing global economic uncertainty — including post-pandemic disruptions, geopolitical conflicts, logistics breakdowns, and energy crises — has made export policy a central pillar of national economic strategies. For developing countries, exports are not merely a source of foreign exchange but a driver of industrial modernization, job creation, and integration into international markets. Hence, strengthening export strategies is now essential to ensure economic resilience and sustainable growth.

Uzbekistan has taken significant steps in this direction. The country's 2022–2026 Development Strategy explicitly prioritizes the expansion of export potential, diversification of export products, and entry into new markets. As a result, Uzbekistan's export volume reached $24.3 billion in 2023, reflecting a growth rate of 25.9% compared to the previous year.

Nevertheless, structural challenges persist. Critical factors such as underdeveloped logistics infrastructure, limited access to export financing, gaps in international certification, and fluctuations in global demand continue to hinder the full realization of export-led development. Therefore, the analysis of export strategies and their impact on economic stability holds pressing scientific and policy relevance in the current context.

Literature Review

Classic economists such as David Ricardo and Adam Smith explained the benefits of trade using absolute and comparative advantage theories. Contemporary models emphasize the Export-Led Growth (ELG) hypothesis, asserting that exports drive economic growth and long-term stability (Krugman, 1994; Balassa, 1985).

Reports by the World Bank, UNCTAD, and IMF highlight that developing countries often struggle due to high dependency on raw materials, limited access to diversified markets, and poor participation in global supply chains.

Uzbek researchers, including T. Jalilov and D. Obidov, focus on the necessity of structural diversification, export financing mechanisms, and international quality standards to increase export competitiveness. These studies underscore that a systemic and inter-sectoral approach is vital for successful export strategy formulation.

Methodology

This study employs the following methods:

- **Statistical Analysis:** Examines Uzbekistan's export volume, growth rate, and structure from 2020 to 2023.
- **Trend Analysis:** Measures export's share in GDP and changes in foreign currency revenue.
- **Factor Analysis:** Identifies and evaluates export-influencing factors such as logistics, certification, financing, and foreign demand.
- **Herfindahl–Hirschman Index (HHI):** Evaluates export diversification.
- **Comparative Analysis:** Compares export structure changes between 2020 and 2023.

THE MULTIDISCIPLINARY JOURNAL OF SCIENCE AND TECHNOLOGY

VOLUME-5, ISSUE-5

All data was sourced from the State Statistics Committee of Uzbekistan, the Central Bank, World Bank, and UNCTAD official reports.

Results

1. Export Volume and GDP Share:

Year	Export Volume (billion $)	Growth (%)	Share in GDP (%)
2020	15.1	—	25.0
2021	16.6	+9.9%	24.0
2022	19.3	+16.3%	24.1
2023	24.3	+25.9%	28.4

2. Key Factors Influencing Export:

- **Logistics Infrastructure:** Lack of access to seaports, high freight costs, and delays at customs.
- **Financing:** Limited availability of export credits, guarantees, and insurance.
- **Product Certification:** Many domestic products fail to meet international standards.
- **Trade Costs:** High tariffs and overheads reduce competitiveness.
- **External Demand:** Global economic downturns directly affect export revenue.

3. Strategic Focus Areas:

- Promote value-added and processed goods.
- Expand trade relations with South Asia, Africa, and the Middle East.
- Strengthen digital trade infrastructure.
- Establish free trade zones and customs simplifications.

Conclusion

The findings affirm that exports play a vital role in ensuring economic resilience. Although Uzbekistan has made notable progress in export promotion, challenges related to diversification, quality control, financing, and logistics remain unresolved. For sustained economic growth, the following recommendations are essential:

1. Promote sector-based export strategies with value addition.
2. Strengthen institutional support for exporters, including tax and credit incentives.
3. Upgrade transportation and logistics systems.
4. Build strategic international partnerships and market access.
5. Develop digital platforms for e-export and global marketing.

These efforts will position Uzbekistan as a competitive player in the global economy and reinforce its economic sustainability.
