THE TYPOLOGICAL ANALYSIS OF THE SYNTACTIC FEATURES OF SUBORDINATE PHRASES IN PRESENT DAY ENGLISH AND UZBEK/RUSSIAN LANGUAGES

Amrullayeva Durdona
Uzbekistan state World languages
4-year student

Abstract: This article presents a comparative typological analysis of the syntactic features of subordinate phrases in Present Day English, Uzbek, and Russian. It examines structural differences and similarities, classification of subordinate clauses, word order tendencies, and functional-semantic roles of subordination. The paper also highlights examples from each language to illustrate key distinctions.

Keywords: subordinate clauses, syntactic features, typology, English, Uzbek, Russian, complex sentences, subordination

Introduction

Subordinate phrases (or subordinate clauses) play a critical role in the syntactic structure of complex sentences across languages. They provide additional information and enable hierarchical syntactic organization. This paper seeks to explore the typological similarities and differences in the formation and function of subordinate clauses in three linguistically distinct languages: English (Germanic), Uzbek (Turkic), and Russian (Slavic).

Main body

Typological linguistics classifies languages based on their structural properties. Syntactic typology particularly focuses on word order, clause structure, and grammatical relations. Subordinate phrases are categorized based on function (e.g., noun, adjective, adverb clauses) and form (conjunctions, relative pronouns, etc.).

- English:English recognizes three main types of subordinate clauses:

Noun Clauses: I know that he is coming.

Relative (Adjective) Clauses: The book that you gave me is interesting.

Adverbial Clauses: I will call you when I arrive.

English subordinate clauses are usually introduced by subordinators (that, if, because, when, although, etc.) or relative pronouns (who, which, that).

- Uzbek:Uzbek uses postpositions, participles, and converbs for subordination. Key types include:

Noun Clauses: U kelishini bilaman. ("I know that he will come.")

Relative Clauses: Formed using participles. Sen bergan kitob juda qiziq. ("The book you gave is very interesting.")

Adverbial Clauses: Often use converbs. Men kelganimda, u ketgan edi. ("When I came, he had left.")

Uzbek is a left-branching (SOV) language; subordinate clauses usually precede the main clause.

- Russian:Russian subordinate clauses are similar in classification to English but often use a wider range of subordinating conjunctions.

Noun Clauses: Я знаю, что он придёт. ("I know that he will come.")

Relative Clauses: Книга, которую ты дал, интересная. ("The book you gave is interesting.")

Adverbial Clauses: Когда я пришёл, он ушёл. ("When I came, he had left.")Word order in Russian is more flexible due to inflectional morphology.

Feature English (SVO) Uzbek (SOV) Russian (SVO, flexible)

Position of Subordinate Clause Often follows main clause Usually precedes main clause Variable (flexible)

Use of Conjunctions Yes (that, because, etc.) Limited use, often non-overt Yes (что, когда, если)

Use of Relative Pronouns Common Absent, replaced with participles Common (который, что)

- English: Overt conjunctions and relative pronouns are essential. Example:

I think that she is right.

- Uzbek: Subordination is often implicit; verb forms play a key role.

U kelganida, men yo‘q edim. ("When he came, I was not there.")

- Russian: Uses a combination of conjunctions and relative pronouns.

Он сказал, что придет позже. ("He said that he would come later.")

English: Low inflection, relies heavily on word order.

Uzbek: Agglutinative, rich verbal morphology; participles and converbs express subordination.

Russian: Fusional, with case endings providing syntactic cues, allowing flexible clause positioning.

Functin	English	Uzbek	Russian
Causal	Because he was tired	Charchagani uchun	Потому что он устал
Temporal	When she arrived	U kelganda	Когда она пришла
Conditional	If he calls	Agar u qo‘ng‘iroq qilsa	Если он позвонит
Purpose	So that I can learn	O‘rganishim uchun	Чтобы я мог учиться

Example 1: Temporal Clause

THE MULTIDISCIPLINARY JOURNAL OF SCIENCE AND TECHNOLOGY

VOLUME-5, ISSUE-6

- ✓ English: She cried when she heard the news.
- ✓ Uzbek: U xabarni eshitganida yig‘ladi.
- ✓ Russian: Она заплакала, когда услышала новость.

Example 2: Conditional Clause

- ✓ English: If it rains, we will stay home.
- ✓ Uzbek: Agar yomg‘ir yog‘sa, uyda qolamiz.
- ✓ Russian: Если пойдет дождь, мы останемся дома.

Example 3: Relative Clause

- ✓ English: The man who called me is my uncle.
- ✓ Uzbek: Menga qo‘ng‘iroq qilgan odam amakam.
- ✓ Russian: Человек, который мне звонил, — мой дядя.

Conclusion

Despite universal syntactic functions of subordination, English, Uzbek, and Russian exhibit distinct structural strategies. English relies on overt subordination with fixed word order; Uzbek uses morphological derivation (participles, converbs), while Russian balances overt conjunctions with flexible structure due to rich morphology. Understanding these differences aids in language learning, translation, and linguistic theory.
