Abstract.

This study examines the elliptical and abbreviated usage of Russian and English proverbs in daily communication, analyzing their pragmatic and cultural implications. Ellipsis in proverbs enhances linguistic efficiency and relies on shared cultural knowledge. Through a comparative analysis, this paper explores how social, contextual, and cultural factors influence the shortened forms of proverbs in both languages. The findings highlight the role of proverbs as tools for effective intercultural communication.

Keywords: proverb, ellipsis, abbreviation, pragmatics, culture, speech, Russian language, English language

Introduction .

Proverbs are linguistic expressions deeply rooted in cultural wisdom, serving as concise reflections of societal values (Mieder, 2004). In everyday speech, proverbs are often used in elliptical forms—shortened versions that rely on the listener's familiarity with the full expression. This phenomenon, known as ellipsis, is a pragmatic strategy that increases communicative efficiency (Biber et al., 1999).

This paper investigates the truncated usage of Russian and English proverbs, focusing on their cultural and pragmatic functions. Key research questions include:

1. How does ellipsis manifest in Russian and English proverbs?
2. What cultural and pragmatic roles do shortened proverbs play?
3. How do cross-cultural differences influence elliptical proverb usage?

Methods.

This study employs a qualitative approach, analyzing examples of elliptical proverbs from:

- Speech corpora (Russian National Corpus, COCA for English)
- Paremiological studies (Mieder, 2004; Permyakov, 1979)
- Pragmatic discourse analysis (Yule, 1996)

Data was categorized by:

1. Frequency of ellipsis in spoken vs. written discourse.
2. Cultural context (individualistic vs. collectivist societies).
3. Pragmatic function (persuasion, humor, irony).

Results.

Ellipsis in Proverbs and Its Pragmatic Role

Ellipsis omits redundant elements while retaining meaning (Merchant, 2001). Examples include:

THE MULTIDISCIPLINARY JOURNAL OF SCIENCE AND TECHNOLOGY
VOLUME-5, ISSUE-6

- Russian: "Семь раз…" (Full: "Семь раз отмерь, один раз отрежь")
- English: "When in Rome…" (Full: "When in Rome, do as the Romans do")

Shortened Proverbs in Russian.

Common elliptical Russian proverbs:

1. "Аппетит приходит…" (Full: "Аппетит приходит во время еды")
2. "Дареному коню…" (Full: "Дареному коню в зубы не смотрят")
3. "На вкус и цвет…" (Full: "На вкус и цвет товарищей нет")

Shortened Proverbs in English.

Frequently abbreviated English proverbs:

1. "Easy come…" (Full: "Easy come, easy go")
2. "The early bird…" (Full: "The early bird catches the worm")
3. "Out of sight…" (Full: "Out of sight, out of mind")

Cross-Cultural Comparison .

Feature	Russian proverbs
Structure	Retain more syntax
Tone	Stoic/fatalistic
Usage context	Interpersonal solidarity

Discussion.

Cultural Foundations of Elliptical Proverbs

Elliptical proverbs function due to shared cultural knowledge (Dundes, 1981). Their usage signals in-group familiarity, reinforcing social cohesion.

Shortened proverbs adhere to Grice's (1975) Maxim of Quantity—providing sufficient information without redundancy. This makes speech more fluid and context-dependent. Younger generations increasingly replace traditional proverbs with internet memes and slang (Norrick, 2015), suggesting evolving communicative norms.

Conclusion

The elliptical use of Russian and English proverbs demonstrates linguistic economy and cultural embeddedness. These shortened forms enhance communicative efficiency while relying on shared societal knowledge. Future research could explore generational shifts in proverb usage and digital communication's impact on paremiology.
