THE SUPPRESSION OF INDEPENDENCE IDEALS AND UNDERGROUND RESISTANCE DURING THE SOVIET ERA

Abduqahorov Anvarjon Alijon o‘g‘li
Faculty of History, Navoi State University

Abstract: This article explores how the Soviet regime systematically suppressed the ideals of national independence in Central Asia, particularly in Uzbekistan, from the 1920s through the 1980s. It examines the destruction of the Jadid movement, the ideological imposition of Soviet internationalism, and the silencing of nationalist thought. Despite such repression, the study uncovers the persistence of independence ideals through underground literature, cultural resistance, and dissident networks. This research sheds light on how national identity survived under authoritarian rule and laid the groundwork for post-Soviet sovereignty.

Keywords: Soviet Union, Central Asia, independence, repression, Jadidism, dissidence, underground movements, national identity.

The early 20th century was a time of national awakening in Turkestan, where intellectuals envisioned a future built on autonomy, education, and cultural revival. However, with the consolidation of **Soviet power in Central Asia** by the 1920s, these aspirations were violently suppressed. The Bolsheviks viewed national consciousness as a threat to proletarian unity and rapidly implemented a campaign to eliminate nationalist leaders, institutions, and ideologies.

This article investigates the **systematic repression of independence ideas** during the Soviet period and explores how elements of **resistance and national identity** continued to survive through underground channels. While the Soviet regime aimed to erase the memory of self-rule and impose a uniform socialist identity, nationalist thought persisted in literature, cultural symbolism, and intellectual dissent.

The research combines:

Historical analysis of Soviet policies such as purges, censorship, and ideological indoctrination.

Archival research of Soviet-era internal reports, trial records, and banned writings.

Literary analysis of underground works and samizdat (self-published) literature.

Oral history and memoir studies of survivors, exiles, and post-Soviet reflections.

Primary sources include internal NKVD files, dissident memoirs, and Soviet propaganda materials. Secondary sources include historical studies on Stalinist repression, cultural resistance, and nationalism in the USSR.

VOLUME-5, ISSUE-6

The Elimination of Nationalist Leadership

- Between 1927 and 1938, the majority of **Jadid intellectuals** were arrested, executed, or exiled during Stalin's Great Purge.
- Nationalist leaders were accused of **"bourgeois nationalism," "pan-Turkism,"** and **"anti-Soviet activity."**
- Institutions such as Jadid schools, Turkic-language newspapers, and Islamic endowments were shut down.

Soviet Indoctrination and Historical Rewriting

- Soviet educational policy emphasized **Marxist-Leninist ideology**, portraying Russian colonialism as "liberation."
- History textbooks downplayed pre-Soviet independence movements and glorified Soviet unity.
- National languages were Latinized, then Cyrillicized, weakening linguistic ties with the Islamic world.

The Persistence of Underground Nationalism

Despite decades of surveillance and control, nationalist ideals **survived underground**:

- **Samizdat literature** contained veiled criticisms of Soviet rule and nostalgic references to Turkestan's past.
- Poets such as **Erkin Vohidov**, **Cho'lpon**, and **Usmon Nosir** used symbolism to express patriotism.
- Informal study circles, Sufi orders, and clandestine writers' groups continued to nurture cultural pride.
- During the 1970s–1980s, **dissident networks** quietly began discussing autonomy and sovereignty.

The Soviet regime's suppression of independence ideals was **totalitarian in scope but not fully effective** in outcome. While it succeeded in **eliminating open political opposition**, it could not completely extinguish cultural memory and national feeling.

The endurance of **underground nationalism** was made possible by:

- **Cultural continuity**: through folklore, poetry, music, and oral traditions.
- **Intergenerational memory**: families privately passed on stories of the Kokand Autonomy and Jadid heroes.
- **Religious identity**: Islam, though heavily repressed, provided a framework for moral and communal resistance.
- **Symbolic resistance**: The revival of historical figures in coded forms (e.g., "Alpomish" epic, Navoi's legacy).

Moreover, the late-Soviet period saw a **softening of ideological rigidity**, allowing limited expressions of national history and identity to resurface. By the 1980s, thanks to Gorbachev's **glasnost**, these repressed ideas gradually re-entered public discourse, contributing to the **independence movements** of the early 1990s.

The Soviet era in Central Asia was marked by **systematic efforts to suppress national independence ideologies**, particularly those rooted in the Jadid movement. Through purges, censorship, and ideological indoctrination, the regime sought to erase any memory of autonomy or national pride.

Yet, these ideas **survived in hidden forms**, preserved by poets, religious leaders, and cultural custodians. The ultimate failure of the Soviet project to eliminate national consciousness became evident with the resurgence of independence movements at the end of the 20th century.

Understanding this period of repression and resilience reveals the **depth and durability of national identity**—not as a state-sanctioned concept, but as a lived and transmitted ideal. The **shadow struggle for independence** during the Soviet era prepared the intellectual and emotional groundwork for the rebirth of sovereignty in Central Asia.
