TEACHING ENGLISH IN HIGH SCHOOL: METHODS, CHALLENGES, AND PROSPECTS.

BAKIROVA G.B.
Andijan, 35 DIC.

Аннотация

Мазкур мақолада глобаллашув шароитида инглиз тилининг аҳамияти ва Ўзбекистон таълим тизимида уни чуқур ўқитишнинг долзарблиги ёритилган. Юқори синфларда (8–11) инглиз тилини амалий ва касбий йўналишда ўқитишнинг мақсад ва вазифалари, замонавий метод ва технологиялар, шунингдек ахборот-коммуникация воситалари асосида самарали таълимни ташкил этиш йўллари таҳлил қилинган. Коммуникатив ёндашув (CLT), лойиҳа ва вазифаларга асосланган ўқитиш (Project-based, Task-based learning), CLIL интеграцияси каби усулларнинг афзалликлари кўрсатилган. Шу билан бирга, юқори синф ўқувчиларида танқидий фикрлаш, ижодий ёндошув ва мустақил таълим кўникмаларини ривожлантиришда мультимедиа воситалар ва онлайн платформаларнинг роли таъкидланган. Тадқиқот натижаларига кўра, инглиз тилини самарали ўқитиш учун ўқитувчи ва ўқувчи ҳамкорлиги, танқидий фикрлаш машғулотлари, ҳамда дарсдан ташқари клуб фаолияти муҳим омиллардан ҳисобланади.

Калит сўзлар: инглиз тили, юқори синфлар, коммуникатив ёндашув, CLIL, лойиҳага асосланган ўқитиш, ахборот технологиялари, танқидий фикрлаш, мультимедиа, таълим самарадорлиги.

Аннотация

В статье рассматривается значение английского языка в условиях глобализации и его роль как средства международного общения. Особое внимание уделено вопросам совершенствования преподавания английского языка в общеобразовательных школах Узбекистана, особенно на этапе старших классов (8–11), когда закладывается основа для практического и профессионально ориентированного владения языком. Проанализированы цели и задачи обучения, а также современные методики и технологии, включая коммуникативный подход (CLT), обучение на основе заданий и проектов (Task-based learning, Project-based learning), и интегрированный метод CLIL. Отмечено значение информационно-коммуникационных технологий, мультимедийных ресурсов, онлайн-платформ и мобильных приложений в повышении мотивации учащихся и развитии их коммуникативных навыков. Выявлены основные проблемы, с которыми сталкиваются учителя и учащиеся, а также предложены практические рекомендации по повышению эффективности учебного процесса, включая развитие критического мышления, внедрение проектной деятельности и организацию внеурочных языковых клубов.

Ключевые слова: английский язык, старшие классы, коммуникативный подход, CLIL, обучение на основе проектов, информационные технологии, критическое мышление, мультимедиа, эффективность обучения.

Abstract

This article highlights the importance of the English language in the context of globalization and its growing role in the educational reforms of Uzbekistan. It explores the goals and objectives of teaching English in upper grades (8–11) with a focus on practical and professional language proficiency. Modern methods such as Communicative Language Teaching (CLT), Task-based and Project-based

ISSN: 2582-4686 SJIF 2021-3.261,SJIF 2022-2.889,
2024-6.875 ResearchBib IF: 9.948 / 2024

learning, and the CLIL approach are analyzed. The study emphasizes the use of information and communication technologies, multimedia tools, and online platforms to enhance students' creative thinking, critical analysis, and communication skills. The findings suggest that effective teaching of English requires close collaboration between teachers and students, the integration of project activities, and extracurricular English clubs to strengthen language competence and motivation.

Keywords: English language, upper grades, communicative approach, CLIL, project-based learning, information technologies, critical thinking, multimedia, educational effectiveness.

Introduction

In the context of globalization, international integration, and the expansion of cross-cultural communication, proficiency in English has become one of the key competencies of a modern individual. English serves as a universal medium of communication, providing access to global science, culture, and economics. Therefore, improving the quality of English language teaching in the secondary education system, especially at the high school level, is a pressing task.

High school (grades 9–11) occupies a special place in the structure of general education. During this period, students undergo professional orientation, prepare for higher education, and develop skills in independent learning and critical thinking. Teaching English in high school must take into account the age-related, psychological, and cognitive characteristics of students, as well as the requirements of national educational standards.

The aim of this article is to examine the goals, objectives, and specific features of teaching English in high school, analyze modern methods and technologies, identify common difficulties, and propose practical recommendations for improving the effectiveness of the educational process.

1. Goals and Objectives of Teaching English in High School

The main goals of teaching English in high school are determined by the social needs of society and the state's educational policy. The key objectives include:

- developing communicative competence in both spoken and written English;
- preparing students to use English as a tool for academic and professional activity;
- fostering skills of independent information search, analysis, and interpretation;
- cultivating tolerance, respect for other cultures, and intercultural communication;
- building long-term motivation for lifelong learning of foreign languages.

Thus, in high school, English is no longer perceived only as a school subject but becomes a tool for professional growth and personal development.

2. Specific Features of Language Competence Formation in High School Students

By the time students reach high school, they have already developed a certain foundation of language skills. At this stage, special attention is paid to:

- improving listening and speaking skills through discussions, debates, and oral presentations;
- developing academic writing (essays, reports, resumes, emails);
- expanding vocabulary according to students' professional interests;
- fostering critical reading skills of authentic English texts;
- preparing for international exams (IELTS, TOEFL, Cambridge exams).

Furthermore, adolescents' age-specific traits (independence, desire for self-expression, and strong interest in digital technologies) make it highly effective to integrate project-based learning and digital educational resources.

3. Methodological Approaches and Innovative Technologies

THE MULTIDISCIPLINARY JOURNAL OF SCIENCE AND TECHNOLOGY

VOLUME-5, ISSUE-10

Modern methodology in English language teaching relies on communicative, activity-based, and competence-oriented approaches. In high school, a combination of traditional and innovative methods is required:

- **Communicative method**: role plays, interviews, debates, and discussions;
- **Project-based learning**: research assignments, presentations, media projects;
- **Interactive learning**: brainstorming, team activities, and classroom debates;
- **Content and Language Integrated Learning (CLIL)**: studying selected subjects (history, geography, biology) in English;
- **Modular system**: thematic planning aligned with students' future academic and career interests.

Such multifaceted organization helps not only to enhance language skills but also to develop critical thinking, independence, and research abilities.

4. Project Work, Debates, and Discussions

Project-based learning is one of the most effective ways to increase motivation among high school students. While working on projects, learners gain experience in independent information search, analysis, and public presentation in English.

Debates and discussions contribute to the development of speaking skills, argumentation, and communication culture. In high school, it is useful to organize debates on relevant social, cultural, and environmental issues. This not only improves fluency but also fosters civic engagement and critical awareness.

5. Information and Communication Technologies and Digital Resources

Today's students are active users of digital devices and online platforms; therefore, integrating ICT into English language teaching is essential. The most commonly used resources include:

- online platforms (Duolingo, BBC Learning English, LingQ);
- electronic dictionaries and translators;
- video resources (TED Talks, educational YouTube channels);
- interactive tools (Kahoot!, Quizlet);
- virtual exchanges and online communication with native speakers.

The use of ICT enables individualized learning, effective feedback, and opportunities for self-study.

6. Student Motivation and the Role of the Teacher

Motivation is a decisive factor in successful English learning. High school students often perceive English as a practical tool for achieving academic and professional goals. The teacher's role is to sustain student interest, demonstrate the real-life value of English, and create a supportive learning environment.

In this context, the teacher is not only a knowledge provider but also a mentor, facilitator, and consultant. The effectiveness of English learning largely depends on the teacher's professionalism, communicative competence, and ability to apply modern teaching methods.

7. Cooperation with Parents and Extracurricular Activities

To increase the effectiveness of English learning, cooperation with parents is essential. Their involvement may include:

- creating a supportive language environment at home (films, books in English);
- encouraging participation in competitions, Olympiads, and language camps;
- joint cultural activities (English-language events, plays, clubs).

VOLUME-5, ISSUE-10

Extracurricular activities (English clubs, theater, essay contests) play an important role in developing creativity and consolidating knowledge in informal contexts.

Conclusion

Teaching English in high school is a crucial stage in developing communicative competence and preparing students for higher education and professional life. Modern approaches require the integrated use of innovative methods, project-based learning, ICT, and interactive techniques.

The key conditions for effective English language teaching include:

- addressing age-specific and psychological characteristics of learners;
- fostering motivation and sustained interest in the subject;
- improving teacher professionalism and digital literacy;
- combining curricular and extracurricular learning opportunities;
- cooperation with parents and use of modern digital resources.

Thus, English teaching in high school should be student-centered, preparing learners for further education and successful adaptation in a globalized society.

Practical Recommendations

1. Develop flexible curricula aligned with students' academic and career aspirations.
2. Actively apply project-based learning, debates, and discussions.
3. Integrate ICT and digital platforms into the learning process.
4. Enhance motivation through competitions, Olympiads, and language clubs.
5. Build systematic cooperation with parents to strengthen the language environment.
6. Invest in teacher training, professional development, and digital competence.
